CHAS BEAN

> Full-Stack & AI Engineer · ex-CTO · Ferndale, MI · Open to Remote Roles

[chasbean.com](#) | [charlesparkerbean@gmail.com](#) | [github.com/chas-bean](#) | [linkedin.com/in/chasbean](#)

chas@macbook:~\$ cat summary.txt

Full-stack engineer and former startup CTO with **10+ years** taking products from zero to scale at venture-backed startups. I build **developer platforms and full-stack products** – APIs, SDKs, and agentic systems – end to end, from design through infra; most recently an **autonomous SaaS negotiation agent**. Happiest building **ethical products** with small, high-trust teams.

chas@macbook:~\$ cat experience.md

Vertice (acquired Vendr) :: Senior Software Engineer II

JUL 2023 – PRESENT · REMOTE

Series B AI-powered SaaS pricing & negotiation – \$216M raised, ~\$30M ARR; ~400 orgs; acquired May 2026.

> Co-owned the real-time **agentic backend** powering [Ruth](#), Vendr's autonomous negotiation agent – a streaming LLM service serving **5K MAU** and **~60K LLM calls/mo**, with history, document extraction, and resumable sessions, plus tracing and evals.

> Solo-architected the **full-stack multiplayer chat system** for running autonomous negotiations end-to-end with [Ruth](#) – coordinating 4 agents over a canonical **append-only event timeline** with point-in-time, VFS-backed memory.

> Co-built a [published SDK](#), [public pricing APIs](#) (OpenAPI), and an [MCP server](#) that let partners like **Zip** and **TrustRadius** embed Vendr's pricing intelligence into their products – **3.1M requests/mo** at a **57ms p50**, **2.7M MCP events/mo**.

> Cut **per-turn LLM cost** by 65% across **3B tokens/mo** – optimizing tool-call chains, payloads, encodings, prompt caching, and hot-path queries – holding spend to **~\$8K/mo**.

> Designed and built an **integrations foundation** that ingests documents in real time to surface savings and trigger renewals – shipping **file storage connectors** with Google Drive, Dropbox, and Box.

> Single-handedly built a Honey-style [Chrome extension](#) that detects SaaS vendor sites and surfaces Vendr's pricing savings & insights on-page – adopted by **500+ users** across orgs.

> Co-led post-acquisition migration from **Sentry** to **OpenTelemetry + Grafana** across the legacy app, **~150 Lambdas**, and ECS services – supporting customers including **Anthropic**, **Brex**, **Duolingo**, **Grammarly**, **Gong**, **TIME**, **Twilio**.

Toucan (acquired by Babbel) :: Senior Software Engineer II

JAN 2023 – MAR 2023 · REMOTE

Series A language-learning browser extension – \$30M raised; 1.5M+ downloads, 12 languages, featured by Google and Microsoft.

> Shipped browser-extension features delivering **2B+ in-context language lessons** to **~1M users**.

> Built **A/B-tested monetization features** that lifted conversion **33% in one month**.

Plain Sight :: Chief Technology Officer

AUG 2019 – JUN 2022 · DETROIT, MI

Seed-funded in-person networking app – \$2M raised; featured on Product Hunt and the Apple App Store.

> Owned technical direction as CTO – led **3 engineers plus contractors**, ran white-glove email & push marketing campaigns, and personally hosted the in-person meetups the product was built around.

> Steered the company through **2 full pivots in 3 years** – from geofenced in-person networking, to a remote social feed when COVID hit, to an in-person **events & ticketing** platform.

> Built and shipped the web + mobile apps end-to-end with automated CI/CD and release monitoring – a **99.27% crash-free rate** over **200+ releases** to **10k+ users**.

> Delivered **20+ production features** – Stripe payments, ticketing & check-ins, real-time push, search, and recommendations – with end-to-end test coverage.

IndustryStar :: Senior Software Engineer

DEC 2015 – AUG 2019 · ANN ARBOR, MI

Supply-chain management platform at a self-funded startup (2nd engineering hire).

> Led front-end development as the **2nd engineering hire** – driving a **full rewrite that cut duplicated/dead code by 30%+** – and shaped product direction across release estimates, vision, and UX.

> Shipped full-stack features end-to-end – **real-time collaborative spreadsheets**, supplier search, templated emails, and subscriptions – and redesigned the REST API architecture.

> **Mentored and recruited** junior engineers and interns.
